

# Catch Some Rays

Craftmade introduces a new way to catch some rays. Like the sun peeking through clouds, our new LightRays™ ceiling fan features slender rays of light shining through artistically formed louvers. So new and exciting, you might want to shade your eyes. But we recommend looking directly at it, so you won't miss a single beam.

To see the light from the new LightRays ceiling fan, call your Craftmade representative or visit our showroom.
